

Cookie Policy

A Cookie file is a small piece of data sent from a website and stored in a user's web browser while a user is browsing a website. When the user browses the same website in the future, the data stored in the cookie can be retrieved by the website to notify the website of the user's previous activity. Cookies were designed to be a reliable mechanism for websites to remember the state of the website or activity the user had taken in the past. This can include clicking particular buttons, logging in, or a record of which pages were visited by the user even months or years ago.

Purposes of storage and gaining access to cookies:

- Website personalisation (for example: saving font size, sight challenged version of website or template version)
- Saving data or user's decisions (for example: no need to enter login and password on every website, remembering login during the next visit, keeping information on products added to cart)
- Social websites integration (for example: displaying your friends, fans or post publishing on Facebook or Google+ directly from the website)
- Adjusting adverts that are display on the website
- Creating website's statistics and flow statistics between different websites

However, you may prefer to disable cookies on this site and on others. The most effective way to do this is to disable cookies in your browser. We suggest consulting the Help section of your browser or taking a look at [the About Cookies website](#) which offers guidance for all modern browsers
